

## 100% Blackout Curtain Systems

**Blackout curtains-is a unique barrier between light and dark, sound and silence, warmth and cold.**

**100% Blackout. Such effect is achieved as result of using a special technology of interlacing of fibers.**

### Functions 100% Blackout Curtains:

- Temperature control and thermal insulation
- Noise reduction
- Fire resistant
- Never lose color under the influence of the sun
- Very easy to care for it
- Long time usable

### Modern production blackout curtains can be at 2 technologies:

- Technology of dusting. On the fabric is applied from the outside light dusting. The fabric is processing inside, giving it aesthetic beauty and attractiveness. This technology allows you to create a fabric of bright colors, but this covering is short-lived, can crack or tear. In case of damage curtain stop hold back light.
- Technology of interlacing of fibers. At production of fabric use 3 yarns and in special way bind them. For achieving reflecting ability of fabric, inside used yarns of black colors. Disadvantage of it – that curtains can't be colorful.

**Attention! Dali Textil Blackout curtains never lose color saturation, because we don't use black yarns inside!**

### You can use it:

- Hotels and restaurants
- Apartments, villas, country houses, cottages
- Night clubs, cafes, cinemas
- Photo laboratories

### Advantages Dali Textile Blackout Curtains:

- ✓ 100% Blackout  
*Special membrane inside + quality fabrics*
- ✓ Width till 3 m  
*No need additional seams for stitching*
- ✓ Colorful front side  
*Absence of interweaving of black yarns*
- ✓ Curtains more soft and easier  
*Dali Textile 2 yarns + thin membrane inside / other producers - have 3 yarns*  
*Dali Textile blackout 1m2 ~ 300gr / other producers 1m2 ~ 1kg*

**For production our total blackout we use inside special membrane which is delivered from Italy and allows to block light for 100%. All our equipment – are modern machines from Germany.**

**Dali Tekstil has been created in 1996. The company is engaged in production of different types of fabrics, but focuses on total blackout. We watch closely the production technology of our fabrics because quality and reputation for us is more important than all other. We think that client can't be simply satisfied. The client has to be happy!**
